### **Transoft adds cash vault logistics**

Bolton, ON, February 22, 2006 - NamSys Inc. announced today that Transoft Inc. will begin marketing NamSys' CC32 cash vault logistics software.

Cash processors such as banks and armored carriers use NamSys' software to control all aspects of deposit verification and cash order preparation in their cash vaults.

Transoft, based in Cary, North Carolina, is a leading provider of cash supply chain management and forecasting software that analyzes current and historical data in order to forecast future cash requirements. Financial institutions use this software to optimize cash holdings and reduce cash transit costs.

NamSys vice president Walter Sawka commented that, "We think Transoft will be an important partner in marketing our software to financial institutions. We have a very similar customer base and the ability to offer a complete cash management system comprised of both logistics and forecasting is increasingly valuable."

Transoft ([www.transoftinc.com](http://www.transoftinc.com)) is the world's leading provider of currency supply chain management and cost optimization solutions for the banking industry. Transoft software manages cash for over 100,000 ATMs, branches and vaults across six continents, and was in 2004 chosen by Deloitte and Touche as one of the top 25 fastest growing technology companies in North Carolina, for the third year in a row.

NamSys Inc. was founded in 1989 and offers a full range of software and hardware products to solve the cash processing needs of the banking and retail industries. For further information, contact Jason Siemens at 1-800-668-1961 or visit our website at [www.namsys.com](http://www.namsys.com).
